

## What is new in Version 3.12

### **ActiveX OPC Controls Version 3.0**

*Following is the list of the changes and new features in the version 3.0.*

#### **OPC Data Access Client Controls**

##### **DATreeView Control**

- The control disconnects automatically upon a server's shutdown request.

##### **OPCDataControl Control**

- The OPCDataItem::Time property returns a Timestamp object.

#### **OPC Alarms and Events Client Controls**

##### **OPCEventView Control**

- Remained unchanged.

##### **OPCAEDataControl Control**

- The OPCEvent::Time and OPCEvent::ActiveTime and properties both return a Timestamp object.
- The OPCDataItem::Time property returns a Timestamp object.

This version has been tested with Microsoft .NET. Check out the samples in the DOTNET folder of your installation.

Now, the OPC DA Controls and the OPC AE controls share a common ActiveX library which implements some common objects as well as means to browse for OPC Servers installed on a computer. Check out the library's documentation to learn more.

We hope that these new feature will help you and improve your productivity.
