

What is new in Version 4.11.0533

OPC Toolbox C++

The following points have been implemented in the OPC Toolbox C++ V4.11.0533 since the V4.10:

- Compliant with the newest compliance test build 1146

Common

- Removed memory leak in SOCmnList::rehash method

Client

- Fixed error in SOClServerBrowser::getCLSIDFromProgId method

Data Access and XML Data Access Client

- Accept in SODaSGroup::update method the revised update rate from the server only if a requested update rate was specified
- Removed memory leaks when accessing the OPCITEMPROPERTIES structure.
- Fixed lock of synchronous call on ethernet breakdown

Data Access and XML Data Access Server

- Removed wrong Deadband behavior with updatarate '0' (every data change).
- Removed a possible memory and handle leak with using notifyAllConnectedObjects and many data changes.
